

Ntec - National Tertiary Education Consortium

Ntec is structured so all schools within the integrated organisation operate with common directors under a common quality management system, adhere to common values and operate from the same campuses across different locations where Ntec schools deliver programs.

Students at Ntec are prepared for careers in accounting, business, computing, cookery, counselling, hospitality, health services and workplace training. Concordia's English Academy offers a wide range of English programs, including general, business, academic, IELTS and TESOL (Teachers of English to Speakers of Other Languages), and Ntec also runs short hospitality courses.
