**OBJECTIVE:** Seeking for a Position in Pharmaceutical Education and Research to use my skills and knowledge:

- To serve and to strive in achieving the goal of organization.
- To perform my best abilities for the position.

**Teaching viewpoint:** Always my goal is to teach students in easy and simple language for better perception of knowledge and its application in their future carrier. During teaching process I utilized modern technology like power point to enhance learning. I also engage the students in lab sessions, small-group discussions and assignments. I try to give theoretical as well as practical knowledge to the students in easiest method. I encourage students not to depend on the class notes and develop habit to read books for gaining more and more knowledge. I always make an effort to instill the habit of self-upgrading by engaging students in activity that needs regular visit to the library and internet for retrieving relevant information to the subject. I utilize short answer quiz, assignments, projects and presentations to evaluate student knowledge.
